

Stay Greener Longer

with E+ Duo Chelation Technology

Introducing E+ Technology, a new, natural organic, duo-chelation technology that includes both proteins and carbohydrates.

E+ provides a natural biochemical enhancement in turf with lasting visual results. This ground-breaking formula motivates Florida's most challenging growing conditions, resulting in long-lasting color and healthy plants.

The unique blend of 27 essential elements encompasses the soil, roots, and stomates. E+ is backed by science, environmentally friendly and completely biodegradable for sustainable turfgrass practices. Duo chelation has an organizational purpose and is directly related to anti-stress physiology in the soil.

Powered by Groundbreaking E+ Duo Chelation Technology with natural organic proteins and carbohydrates.

E+ Duo Chelation Technology

SOIL

- Solubilizing pathways for P and Ca
- Stronger, more robust roots
- Increase the efficiency of most pesticides and fungicides

PLANT

- Increase Photosynthesis and plant health
- Lasting Vivid Color
- Mobilizes nutrients within the plant

ROOTS

- Increased Drought Resistance
- Reduce pesticide and fertilizer inputs
- Increased stress resistance

I used my sample of EcoPlus in my greens spray program at 2 oz/1,000. The results were excellent, I am integrating EcoPlus into my monthly nutritional spray program. It's easy to use and I see results. I can't wait to see how it does after my summer aerification.

Introducing EcoPlus3 Complete, a Bio Fertilizer by ProPlus Products, Inc.

EcoPlus3 Complete, powered by E+ is an ensemble of natural organic compounds made of free proteins, carbohydrates, and micronutrients. Other Bio Fertilizer products only offer one of the two; either carbohydrates or proteins. It will provide the essential building blocks needed for energy and strength. EcoPlus3 Complete is formulated to motivate turfgrass under Florida's most challenging growing conditions. Turfgrass responds with increased stress tolerance, enhanced nutrient uptake, and more efficient growth processes.

Backed by science, powered by groundbreaking E+ Duo Chelation Technology.

Manufactured exclusively by ProPlus Products, Inc. ProPlus knows chelation and the importance of a quality liquid nutritional, we've been doing it for almost 4 decades. Our formulating knowledge combined with high-quality raw materials enabled us to formulate the newest technology in liquid fertilizer.
